

|                                                                                                                       |                                                                           |
|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| Data entry, import, and basic organization using tables                                                               |                                                                           |
| Create table format to arrange and modify all text formats.                                                           |                                                                           |
| Data cleaning: find/remove duplicates, handle missing/inconsistent data, correct formatting errors, and validate data |                                                                           |
| No duplicate values are found in this data.                                                                           |                                                                           |
| Use Clean,Trim and Proper function to modify the Name Column.                                                         |                                                                           |
| Use Find and Replace method to modify USA into USA.                                                                   |                                                                           |
| In Loyalty Level I can found some missing values                                                                      | <code>IF(ISBLANK([@[Loyalty_Level]]),"Unknown",[@[Loyalty_Level]])</code> |

|                                                                                                                              |                                                  |
|------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|
| Use find and replace method to modify the product id's                                                                       |                                                  |
| No duplicate values are found.                                                                                               |                                                  |
| In Brand column found some inconsistent data, I can use Clean,Trim and Proper function to modify all the inconsistent datas. | Clean,Trim and Proper                            |
| Use <code>IF(ISBLANK(G6),AVERAGE(G6:G105),G6)</code> formula to fill missing values in the stock column                      | <code>IF(ISBLANK(G6),AVERAGE(G6:G105),G6)</code> |
| Use <code>IF(ISBLANK(F6),AVERAGE(F6:F105),F6)</code> formula to fill missing values in the cost column                       | <code>IF(ISBLANK(F6),AVERAGE(F6:F105),F6)</code> |

|                                                                                     |                                      |
|-------------------------------------------------------------------------------------|--------------------------------------|
| No duplicate values are found.                                                      |                                      |
| Use <code>PROPER(TRIM(CLEAN(C2)))</code> function to correct the Store Name column. | <code>PROPER(TRIM(CLEAN(C2)))</code> |

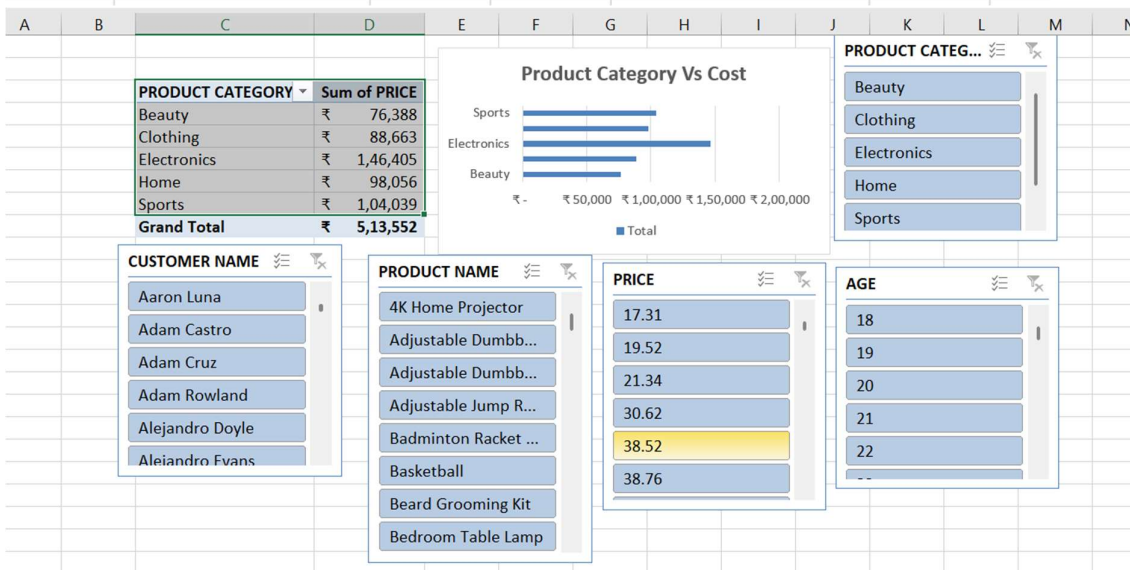

|                                                                                                                              |                                                   |
|------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|
| Order date has been modified to proper date format.                                                                          |                                                   |
| Quantity column found some missing values, use                                                                               |                                                   |
| <code>IF(ISBLANK(F2),AVERAGE(F2:F2001),F2)</code> function to fill the missing values                                        | <code>IF(ISBLANK(F2),AVERAGE(F2:F2001),F2)</code> |
| In unit price column found some missing values, use                                                                          |                                                   |
| <code>IF(ISBLANK(G2),AVERAGE(G2:G2001),G2)</code> function to fill the missing values                                        | <code>IF(ISBLANK(G2),AVERAGE(G2:G2001),G2)</code> |
| Discount column find some some missing values, use <code>IF(ISBLANK(H2),"0",H2)</code> method to fill all the missing values | <code>IF(ISBLANK(H2),"0",H2)</code>               |
| We have identified some problem in the total amount use <code>(G2-H2)*F2</code> formula to calculate the total price.        | <code>(G2-H2)*F2</code>                           |

| UNIT PRICE         |          |
